

- Granitic intrusive
- Shebandowan-type greywacke, arkose, conglomerate
- Shebandowan-type breccio-conglomerate, pigmented
- Keewatin-type felsic volcanic
- Keewatin-type mafic volcanic

- Area of outcrop: large, small
- Cleavage: inclined, vertical
- Bedding: inclined, vertical
- Schistosity: inclined, vertical
- Younging direction
- Structural facing, upward
- Antiform to south
- Antiform to north
- Fold axial trace: antiform, synform
- Geological contact, approximate
- Possible fault
- Hydroelectrical and telephone lines
